

DESTINATION GUIDE

Discover Morocco, One Destination at a Time.

Technical Project Presentation Prepared by: Mounir L Maimouni **Supervised by:** E-sseraj Fouad

Introduction

Destination Guide is a web application designed to help visitors discover the beauty of Morocco and explore its tourist destinations.

- Discover tourist destinations.
- Explore cultural, historical, and natural attractions.
- Access useful information about each destination.
- Manage destinations through a private dashboard. manage destination information easily.

The Need – Problem Statement

Morocco has many beautiful tourist destinations, but visitors may struggle to find organized and reliable information about these places.

Main Problems:

- Tourist information is scattered across different sources.
- Visitors may have difficulty discovering new destinations.
- Finding useful details about destinations can take time.
- Managing destination information manually can be difficult for the Tour Guide.

Our Solution:

Destination Guide brings destination information together in one platform, making it easier for visitors to explore Morocco.

Analysis – Requirements and Features

Visitor

- Browse tourist destinations.
- View destination details.
- Explore Morocco without an account.
